SUMMARY

MCA graduate with expertise in programming, web development, and IoT systems. Proven ability to develop smart, scalable applications. Strong problem-solving skills and collaborative approach enhance contributions to tech teams.

SKILLS

Languages : C, C++, Python, Linux
Front-end Languages : HTML, CSS, JavaScript
Database : MongoDB, MySQL
Operating Systems : Windows
Other skills : Visual Studio Code, Notepad++

EDUCATIONAL CREDENTIALS

Course	Year	Name of School/Institute	University /Board	Percentage
MCA	2023-25	Jagan Institute of Management Studies, Rohini	GGSIPU	79.90
BCA	2020-23	Jagan Institute of Management Studies, Rohini	GGSIPU	86.4
XII	2020	White Leaf Public Sr. Sec. School, Bawana	CBSE	73
X	2018	White Leaf Public Sr. Sec. School, Bawana	CBSE	73

EXPERIENCE

- Company Name : Tech Explica
- Duration : 100 hrs
- Technology : Mern Stack
- Description : Worked as a Web Developer

PROJECTS UNDERTAKEN

1. **Project Title** : IOT Based Home automation system
   Platform : Arduino
   Description : Project based on Transforming homes into smart, connected spaces, an IoT-based home automation system enables remote control and management of appliances, enhancing convenience and efficiency for a modern lifestyle.

2. **Project Title** : IOT Based Health monitoring system
   Platform : Arduino
   Description : Project based on IoT-based health monitoring system leverages wearable devices and sensors to collect real-time data, empowering individuals and healthcare professionals with actionable insights for proactive health management.

3. **Project Title** : Home Décor Website
Platform : Visual Studio Code
Description : Project based on E-commerce. Creating a virtual haven for interior inspiration, our home decor website offers a curated collection of stylish furniture, decor, and design ideas to elevate any living space with effortless charm and personal flair.

4. **Project Title** : Portfolio Website
Platform : Visual Studio Code
Description : My portfolio website is a platform that demonstrates my ability to work with multiple technologies including HTML, CSS and JS.

5. **Project Title** : Online Job Portal
Platform : Visual Studio Code , Xampp
Description : Developed a dynamic **Online Job Portal System** that connects job seekers and recruiters through a user-friendly web platform. Built using PHP, MySQL, HTML, CSS, and Bootstrap, it features role-based dashboards, job posting, resume upload, and application tracking. The system streamlines recruitment by enabling efficient, secure, and centralized hiring processes.

6. **Project Title** : Automatic Number Plate Recognition System
Platform : Visual Studio Code
Description : Developed an **Automatic Number Plate Recognition (ANPR) System** using Python that detects and extracts vehicle number plates through image processing, edge detection, and OCR. Integrated with vehicle databases to retrieve and store vehicle details in JSON format. The system improves vehicle monitoring and supports automated identification and violation tracking.

EXTRACURRICULAR ACTIVITIES

- Participated in workshop on Hackathons, Open Source and Communities.
- Participated in workshop on Introduction to Git and GitHub.
- Completed a course of study offered by IBM, on Introduction to Cloud Development with HTML, CSS, and JavaScript.
- Completed training on Web Development by Tech Explica.
- Completed a course of study offered by Cisco Networking Academy, on Introduction to Cyber Security.
- Completed a course of study offered by Cisco Networking Academy, on Introduction to Internet Of Things.

PERSONAL SKILLS

- Adaptability
- Quick learner
- Creative Thinker
- Active listening
- Attention to Detail
- Time Management
- Collaborative

PERSONAL DETAILS

Date of Birth: 16th August 2002

Father Name : Mukesh Kumar

Address: H.No.-407, Ramayan gali, near Radha Krishna Mandir, Pooth Khurd, Delhi
